

Oregon Energy Trust

Biomass Market Assessment

Final Report

Prepared by:

1104 Main Street, Suite 630
Vancouver, WA 98660

360-906-0616

December 17, 2004

Table of Contents

1 Introduction	1-1
1.1 Overview	1-1
1.2 Study Objectives	1-1
1.3 Study Approach	1-2
<i>Literature Review</i>	1-2
<i>Preliminary Technology Assessment</i>	1-2
<i>In-Depth Interviews</i>	1-3
<i>Analysis and Reporting</i>	1-3
1.4 Report Organization	1-4
2 Market Overview.....	2-1
2.1 Existing Conversion Technologies	2-1
<i>Overview</i>	2-1
2.2 Market Barriers	2-4
2.3 Market Trends.....	2-5
2.4 Equipment Suppliers.....	2-7
<i>Products and Product Availability</i>	2-8
<i>Market Awareness and Potential</i>	2-8
<i>Market Barriers</i>	2-8
<i>Utility Interconnection Cooperation</i>	2-9
<i>System Operations & Maintenance Issues</i>	2-10
<i>Development and Operating Costs</i>	2-11
<i>Reported Needs for Project Support</i>	2-12
2.5 Existing Incentives	2-13
<i>State or Regional Incentives</i>	2-13
<i>Federal Incentives</i>	2-16
<i>Farm Bill Subsidies for Farmers via Direct Grants and Low Interest Loans</i>	2-17
<i>Other Incentive Forms</i>	2-18
3 Issues in Developing Biomass Projects.....	3-1
3.1 Respondent Ratings.....	3-1
3.2 Cow Manure.....	3-4
<i>Power Price and Power Purchase Agreement</i>	3-5
<i>Costs and Financing</i>	3-5
<i>Environmental Approvals</i>	3-6
<i>Utility Interconnection and Net Metering</i>	3-7
<i>Siting</i>	3-7
<i>Soil Quality</i>	3-7
<i>Fuel Resources</i>	3-7
3.3 Wastewater	3-8
<i>Installation Costs and Financing</i>	3-8
<i>Fuel Resources</i>	3-10
3.4 Landfill Gas	3-10
<i>Air Emissions</i>	3-11
<i>Installation and Operating Costs</i>	3-11

<i>Fuel Resources</i>	3-12
3.5 Wood	3-12
<i>Power Price and Power Purchase Agreement</i>	3-13
<i>Installation and Operating Costs</i>	3-14
<i>Collection and Transportation</i>	3-14
<i>Competing Uses</i>	3-15
<i>Environmental Impacts</i>	3-15
<i>Fuel Resources</i>	3-16
<i>Siting</i>	3-17
<i>Utility Interconnection and Net Metering</i>	3-17
3.6 Summary	3-17
4 Lessons Learned	4-1
5 Key Market Opportunities	5-1
5.1 Overview	5-1
5.2 Criteria for Potential Opportunities	5-2
<i>Technical and Market Potential</i>	5-2
<i>Market Infrastructure</i>	5-4
<i>Potential Generating Capacity</i>	5-5
<i>Potential Impact of Incentive on Market</i>	5-6
5.3 Summary of Opportunities in Oregon.....	5-6
6 Program Recommendations	6-1
6.1 Areas to Target	6-1
6.2 Program Intervention Options	6-3
6.3 Recommendations for Further Research	6-4
Appendix A Organizations Interviewed	A-1
Appendix B Interview Guides	B-1
Appendix C Suppliers	C-1
Biomass Technology Suppliers.....	C-1
<i>Near Term Technologies</i>	C-1
<i>Near Term and Intermediate Term Technologies</i>	C-3
<i>Intermediate Term and Long Term Technologies</i>	C-3
Service Providers.....	C-4
Appendix D Existing Facilities in Oregon	D-1

List of Tables

Table 1-1: Interview Sample..... 1-3
Table 2-1: Summary of C&RD Spending on Renewables 2-16
Table 2-2: Summary of Projects Funded by the National Biomass Initiative 2-19
Table 3-1: Reported Significance of Key Development Issues..... 3-2
Table 3-2: Reported Significance of Key Development Issues by End User and Fuel Type..... 3-3
Table 3-3: Operating Dairy Digesters in Oregon 3-4
Table 3-4: Operating Wastewater Biogas Facilities in Oregon 3-8
Table 3-5: Operating Landfill Biogas Facilities in Oregon..... 3-11
Table 3-6: Cost Information Reported for California Landfill Gas Plants 3-12
Table 3-7: Operating Biomass Power & Cogeneration Facilities in Oregon Using Wood Fuel 3-13
Table 3-8: Estimated Costs of a Wood Burning Plant 3-14
Table 3-9: Estimated Wood Supply Costs 3-15
Table 5-1: Comparison of Market Attributes by Fuel Type 5-4
Table A-1: Program Administrator Sample A-1
Table A-2: Supply Channel Interview Sample A-2
Table A-3: End User Interview Sample A-3

List of Figures

Figure 1: Field Cost (\$/MBTU) vs. Energy Potential..... 2-3
